Reasons for allowance

1. This communication is in response to applicant's 03/03/2005 amendment in the application of Markevitch et al. for a "Method of encoding a data packet" filed 05/10/2001. The proposed amendment has been entered and made of record. Applicant's argument and explanation with regard to the rejection under 35 USC 103 are persuasive. Furthermore, the rejections of record under 35 USC 103 of claims are withdrawn as evidence by the discussion follows.

2. Claims 1-12 are allowable as evident by applicant's amendment.

3. The following is an examiner's statement of reasons for allowance: The instant application is deemed to be directed to a no obvious improvement over the prior art of record. The improvement comprises the step of determining the length of data chunk as the lesser of the number of bytes available in a current frame, the number of bytes remaining in the data packet, or a predetermined number of bytes; determining if the data chunk is the end-of-the-packet (EOP), and when the data chunk is not the EOP, pre-pending the data chunk with a control character representing the length of the data chunk and non EOP prior to insertion of the data chunk into a current frame; wherein when the data chunk is the EOP, determining if there is an error in communication of the plurality of data chunks; and when there is not an error in communication of the plurality of data chunks, pre-pending the data chunk with a control character representing the length of the data chunk and EOP, as specifically recited claims. The

closest prior art of record fails to disclose or suggest wherein when there is a mode change, determining if the number of bytes remaining in the current frame is less than a second predetermined number, and the number of bytes remaining in the current frame is not less than the second predetermined number, inserting a control character representing the mode change in the current frame. The instant invention, in combination with the other claimed features, improves upon the Prior Art by providing a method of encoding a data packet for encapsulation in one or more frames for communication from a transmitter to a receiver in a network interface.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Man U. Phan whose telephone number is (571) 272-3149. The examiner can normally be reached Monday through Friday from 6:00 am to 3:00 pm.
